

Introduction

Thank you for Purchasing Randhawaworld's FAQ Manager (Ajax Version) tag. We hope you will be happy with the product. If you have any comments, questions or support requests, please contact us at gavy@randhawaworld.com.

Installation

Quick Installation

Just copy this entire folder to your ColdFusion web server root and browse to the folder in your web browser. To install this in your own application, just copy the folder and paste in your webroot. If you putting this faq within a bigger website as a module. Just make some necessary changes in the admin folder of faq AND Edit the Application.cfc/application.cfm to make changes to the sessions and the Login Page. All other modules will work fine.

Please create a database with name FAQs

And then create DSN of FAQs and enter the values in the fields you will find in the Application.cfc

As:

```
<cfset request.dsn = "faqs">
```

```
<cfset request.user = "root">
```

```
<cfset request.pass = "">
```

Change as per your website requirements.

Please check out the documentation at
<http://www.randhawaworld.com/faq/documentation.pdf>

Online demo available at: <http://randhawaworld.com/ajaxfaq/>
